MENTORING DETAILS

Magnetic Talks is an exclusive group mentoring experience designed for purpose driven entrepreneurs to facilitate inner growth and consciousness alignment.

With limited spaces available, I ensure every participant receives personalized attention and guidance.

In this space entrepreneurs come together to explore higher consciousness to create a new reality that aligns with their true inner values.

Together, I will help you build from the inside out—transforming consciousness first, so you become the kind of person capable of creating and sustaining what you envision.

You will find clarity and conscious direction so you can create long lasting results, you will think clearly and learn conscious energy management.

You will gain essential energy tools to shift your consciousness and elevate your understanding of self and the world around you. With practical and straightforward guidance, you'll discover how to cut through mental fog and emotional barriers.

THE FOUNDATION

“Wisdom leads you to a new foundation a new reality.”

We live in a world that taught us to think, not to feel. Where speed is valued over depth.

Where quantity trumps quality.

But sustainable wealth—the kind that endures—is built from a different place.

It's built from consciousness.

- **NEW REALITY = NEW FOUNDATION:** Building isn't about changing goals. It's about transforming the structure from which you operate—your consciousness and the way of seeing the world. When you change the foundation, everything you build naturally reflects that new reality.

- **QUALITY OVER QUANTITY:** If you want to create sustainable long-term business, always choose quality over quantity. Enduring wealth isn't built on volume is build on real value and conscious structure.
- **EMBODIED WISDOM:** Wisdom comes through the body, through energy, through higher consciousness. It's your whole being—not just your intellect—processing information at a level beyond rational thought that is the only way to better results.

WHAT YOU WILL DEVELOP

- **WISDOM BASED DISCERNMENT:** Develop the cultivated sensitivity to know when to push and when to let go—not from rules, but from feeling the difference in your body, in the situation, in the flow of what's actually happening.
- **ENERGETIC AWARENESS:** Read the energy of situations, people, and opportunities before the data confirms it.
- **LEADERSHIP FROM BEING:** Lead from the integrity of body, mind, and spirit—not just mental strategies.
- **SOMATIC INTELLIGENCE:** Trust your body's signals to make wiser decisions than any spreadsheet.
- **CONSCIOUS ENERGY MANAGMENT:** balancing four key energy dimensions– physical, emotional, mental and spiritual – to sustain performance.
- **CONTEXTUAL VISION:** Read timing, understand the right moment, feel when an opportunity is ripe.
- Personal alignment and purpose integration to generate a conscious business model that creates a positive impact.
- Building self – awareness and emotional intelligence.

WHY NOW?

In a world where people think AI is the solution for everything, human skills will always be more valuable.

Because you cannot replicate wisdom.

AI can analyze data faster than any human. It can spot patterns, predict trends, optimize processes.

But it cannot feel the room. It cannot read energy. It cannot access higher consciousness.

It cannot know when to push and when to let go—not from formulas, but from the integrated intelligence of body, mind, and spirit working as one.

ABOUT *Luli Macchi*

I guide people through profound inner transformation that creates lasting change and reshapes their external reality.

My Approach: Through heightened awareness and strategic inner work, I work with deeper layers of consciousness addressing unconscious patterns and internal barriers that keep them stuck.

Through this inner work people experience:

- Breakthrough moments that shift their entire perspective.
- Liberation from self sabotaging patterns.
- Authentic inner alignment between their inner truth and outer expression.
- Enhanced intuition and decision making clarity.

My Philosophy: Where attention goes, energy flows. When we direct our consciousness intentionally, we become architects of our own reality rather than victims of circumstance.

The people don't just change behaviors, they transform who they are at core. This creates a ripple effects in every area of their lives, from career breakthroughs to deeper relationships to a profound sense of fulfillment.
